

AI Advisory Services

Adopt AI with intention, not just ambition. We help organizations chart a clear path through the AI landscape - connecting technology investments to business outcomes while staying aligned with ethical principles and emerging regulations. The result is AI that delivers real value without unwelcome surprises.

■ AI STRATEGY DEVELOPMENT

Translate business goals into a practical AI roadmap. We identify high-impact use cases, set measurable milestones, and ensure every initiative supports your broader objectives rather than chasing hype.

■ RISK & COMPLIANCE GUIDANCE

Stay ahead of shifting regulations. We assess AI-specific risks, map data flows, and advise on meeting global standards so you can deploy with confidence and avoid costly compliance gaps.

■ SHADOW AI ASSESSMENT

Uncover unauthorized AI tools lurking in your environment. Employees often adopt consumer AI services without IT approval - we find those blind spots and help you bring usage under control.

■ GOVERNANCE FRAMEWORKS

Establish guardrails for responsible AI use. We help build or refine governance structures, define accountability, and create policies that balance innovation with ethical and legal obligations.

■ SECURITY ARCHITECTURE REVIEW

Evaluate how AI components fit into your security landscape. We examine model pipelines, data handling, and integration points to surface vulnerabilities unique to machine-learning systems.

■ THIRD-PARTY AI VETTING

Assess the security posture of vendors and partners providing AI-powered products. We review their controls, data practices, and model safeguards to protect your organization from inherited risk.

WHY BARCODE SECURITY

Rushing into AI without a plan leads to wasted budgets, regulatory headaches, and security blind spots. We bring the strategic clarity and technical depth to help you harness AI responsibly - aligning teams, anticipating rules, and unlocking productivity gains that stick.

ADOPT AI WITH CONFIDENCE. **Start with a strategy conversation.**
