

Executive Protection

High-profile individuals attract high-profile threats. We blend digital security, personal threat intelligence, and customized safety planning to shield executives and their families. Our discreet services span underground monitoring, social media risk analysis, and physical security consulting - all tailored to the unique exposure of leadership roles.

■ DARK WEB MONITORING

Continuously scan underground markets and forums for personal data tied to your executives. We alert you when sensitive information surfaces so you can act before it is weaponized.

■ SOCIAL MEDIA RISK REVIEW

Analyze public profiles for over-shared details that could aid attackers - travel plans, family information, home locations. We provide recommendations to reduce digital exposure.

■ THREAT INVESTIGATIONS

When credible threats emerge, our investigators dig deeper using human intelligence methods to identify sources, assess severity, and recommend protective actions.

■ IMPERSONATION DETECTION

Receive instant alerts when fake social media profiles or lookalike websites appear. We help you take down fraudulent accounts that could deceive employees, partners, or customers.

■ PHYSICAL SECURITY CONSULTING

Assess residence and travel vulnerabilities, recommend protective measures, and coordinate with personal security teams. We bridge the gap between cyber and physical safety.

■ FAMILY COVERAGE

Extend protection beyond the executive. We monitor and advise on risks facing spouses, children, and household staff who may be targeted as softer entry points.

WHY BARCODE SECURITY

We operate as a seamless extension of your team, delivering real-time visibility and expert investigative capabilities with complete discretion. Our analysts combine technical monitoring with hands-on intelligence work to keep leaders and their loved ones safe.

PROTECT YOUR LEADERSHIP. [Request an executive protection consultation.](#)
