

## vCISO Services

Executive security leadership on your terms. Many companies need strategic direction but lack the budget or workload for a dedicated CISO. Our virtual CISO offering delivers experienced guidance on risk decisions, security roadmaps, and stakeholder communication - scaled to fit your needs without the cost of a permanent hire.

### ■ PROGRAM & POLICY DEVELOPMENT

Build or refine your security program from the ground up. We draft policies, standards, and procedures aligned with industry frameworks and tailored to how your business actually operates.

### ■ BOARD & EXECUTIVE REPORTING

Translate technical risk into business language. We prepare board presentations, brief senior leadership, and ensure governance bodies have the visibility they need to make informed decisions.

### ■ QUESTIONNAIRE SUPPORT

Respond to customer and partner security questionnaires quickly and accurately. We handle the back-and-forth so your team can focus on closing deals instead of chasing documentation.

### ■ COMPLIANCE GUIDANCE

Navigate complex regulatory landscapes with confidence. We help you interpret requirements, close gaps, and prepare for audits across SOC 2, ISO 27001, HIPAA, PCI DSS, and more.

### ■ SECURITY PROJECT OVERSIGHT

Keep security initiatives on track and on budget. From tool deployments to process overhauls, we manage timelines, coordinate teams, and ensure deliverables meet expectations.

### ■ VENDOR DUE DILIGENCE

Evaluate third-party and acquisition targets before you sign. We assess security posture, flag hidden risks, and provide clear recommendations to protect your investment.

### WHY BARCODE SECURITY

Our vCISOs have led security programs at organizations of all sizes. You get battle-tested expertise, objective advice, and flexible engagement models - whether you need a few hours a month or ongoing strategic partnership.
