

Incident Response & Digital Forensics

Every second matters during a security breach. BarCode Security provides rapid-deployment teams that neutralize active threats, collect forensic artifacts, and restore normal operations. Our investigators deliver detailed analysis and legally defensible documentation for regulatory and legal proceedings.

■ EMERGENCY RESPONSE

Round-the-clock availability with rapid deployment. Our specialists arrive on-scene or connect remotely within hours to stop active attacks and minimize business impact.

■ MALWARE INVESTIGATION

Detailed reverse engineering to uncover how attackers gained access, what tools they deployed, and which systems were affected - enabling targeted remediation.

■ INVESTIGATIVE REPORTING

Clear documentation including executive summaries, technical breakdowns, attack timelines, and prioritized recommendations for strengthening your security posture.

■ FORENSIC ACQUISITION

Meticulous evidence gathering following strict chain-of-custody standards. Our documentation withstands courtroom scrutiny and satisfies compliance auditors.

■ THREAT ELIMINATION

Isolate infected assets, remove attacker footholds, and deploy emergency safeguards to prevent further spread while preserving evidence for analysis.

■ BUSINESS RESTORATION

Structured return to normal operations with validated clean systems, hardened configurations, and documented procedures to prevent similar incidents.

WHY BARCODE SECURITY

Our forensics team blends technical depth with battle-tested investigative methods. Whether you need support for an internal inquiry, regulatory examination, or litigation matter, we deliver findings that hold up under pressure.
